## Disinfecting Against The “Tripledemic”

January 2023

### *SARS-CoV-2, Influenza and RSV show no signs of slowing down*

As the summer months came to an end and we prepared for the fall season, we heard conversation about Respiratory Syncytial Virus (RSV) and talk about a Flu Season that had begun earlier than normal. We also knew that COVID-19 was still impacting us and the numbers were on the rise once again. What happened was the beginning of a perfect storm that is now known as the “Tripledemic”.

Today, we are faced with having to clean and protect against three viruses that spiked in unison. Schools, places of work and our homes have all become targets for infection. NCL® has a variety of disinfectant products to use in combatting these pathogens. By following the directions for use on these products, users will be able to effectively clean and disinfect areas to help reduce the risk of infection.

	Product #	Product Name
Bulk Disinfectants	<a href="#">0248</a>	<a href="#">Neutral-Q™</a>
